

September 15 | 4 PM - 5 PM

Stop the Spread

Join Jeannie Hoffman-Censits, MD, and Armine Smith, MD, Co-Leaders of the GBCI's Women's Bladder Cancer Program, to learn how patients, urologists, and oncologists work together to slow down and even stop Non-Muscle Invasive Bladder Cancer (NMIBC) from spreading to Muscle-Invasive Bladder Cancer (MIBC) using standards of care and new tools in the toolbox. The two will be joined by a patient telling their remarkable story of resilience and survivorship.

October 13 | 4 PM - 5 PM

Cracking the Cancer Code: Epigenetics: A New Frontier in Understanding Bladder and Other Cancers

Director of the Johns Hopkins Kimmel Cancer Center and Marion I. Knott Director and Professor of Oncology, William Nelson MD, PhD will introduce us to epigenetics and how it plays a crucial role in bladder cancer (BC) development, progression, and treatment.

November 17 | 4 PM - 5 PM

Sleep is your Best Medicine

In collaboration with the Bladder Cancer Advocacy Network, join Charlene Gamaldo, MD, Professor of Neurology, to hear how sleep plays a vital healing role for cancer patients.

December 15 | 4 PM - 5 PM

Immunotherapy and Bladder Cancer

Oncologist Noah Hahn, MD, GBCI Co-Director, will be joined by a patient who together will share their treatment partnership thru immunotherapy, other therapeutics and novel drugs to harness the power of the immune system in the treatment of Bladder and Upper Track Cancers.
